PROFESSIONAL SUMMARY

UI/UX Design student pursuing a Bachelor of Science (Hons) in Software Engineering, with hands-on experience designing user-centered interfaces across web, mobile, and desktop platforms. Completed a 6-month UI/UX internship at Super ITC, a software and technology solutions company, contributing to real-world business software design. Proficient in Figma, wireframing, prototyping, and design systems. Proven ability to deliver end-to-end UX flows for real-world projects, including an AI-powered educational platform and an accessibility-focused application. Eager to contribute design thinking and creative problem-solving skills in a professional UI/UX internship environment.

SKILLS

Design Tools: Figma, Adobe Photoshop, Adobe XD, Canva

UX Methods: Wireframing, Prototyping, User Flows, Interaction Design, Design Systems, Usability Testing

UI Principles: Responsive Design, Component Libraries, Analytics Dashboards, Accessibility, WCAG Guidelines

Development: HTML, CSS, React, Java, C#, Android Studio, Flutter, MySQL, Firebase, MongoDB

Soft Skills: Attention to Detail, Collaboration, Problem Solving, Visual Communication, Fast Learner

EXPERIENCE

Freelance Graphic Designer and Brand Creator | 2023 - Present

- Designed brand identities, logos, and visual assets for multiple clients using Photoshop and Canva, delivering cohesive visual branding packages.
- Managed social media content pipelines and produced digital marketing materials, improving client engagement through consistent visual storytelling.
- Collaborated directly with clients to understand design briefs, iterated on feedback, and delivered polished final assets on deadline.

UI/UX Design Intern | Super ITC, Horana | October 2025 - March 2026

- Designed user interfaces for business software systems including Point of Sale (POS), Inventory Management, and Billing systems, focusing on usability and clean workflow design.
- Created wireframes, mockups, and interactive prototypes in Figma to support development of web-based dashboards and custom business applications.
- Collaborated with the development team to translate business requirements into clear, functional UI designs aligned with real world operational needs.
- Applied user centered design principles to ensure interfaces were simple, predictable, and accessible for everyday business use across retail and SME clients.
- Contributed to UI design for API based web dashboards and multi-user system interfaces as part of the company's transition to modern architecture.

EDUCATION

- **Bachelor of Science (Hons) in Software Engineering**

National Institute of Business Management | November 2023 - Present

Relevant Modules

GUI Development, Developing Modern Web, Mobile Application Development, Enterprise Application Development 1 and 2, Emerging Technologies, Innovations and Entrepreneurship Project

- **Advanced Level** | St. Sebastians College, Moratuwa 2022

Combined Maths- S, Physics- S, ICT- C, English- C

- **Ordinary Level** | Rawathawaththa Methodist College, Moratuwa | 2019

A grade in Maths, Science, ICT, Music, Sinhala, Buddhism, and Commerce

PROJECTS

event.io - Event Management Platform | UI/UX Design Project | 2026

- Designed end-to-end UX for a data-driven event planning web application, including complete user flows, wireframes, and interaction designs in Figma.
- Built a reusable component library and design system with modern UI patterns including dark mode, card layouts, and analytics dashboards.
- Introduced AI-based insights and engagement tracking features to support complex, data-rich interface requirements.

Mentora - AI-Powered Educational Platform | HND Final Project | 2025

- Led the complete UI/UX design for an AI-driven learning platform built with Next.js, Tailwind CSS, Firebase, and OpenAI API.
- Designed user authentication flows and contributed to front-end development and technical documentation.

AccessHive - AI and XR Accessibility Platform | Group Project | 2025

- Designed accessibility-focused UI for visually impaired users, applying WCAG guidelines and inclusive design principles throughout.
- Created user flows, wireframes, and interaction designs; collaborated on AI-based navigation feature development.

UrbanFood - E-Commerce Web Application | Academic Project | 2025

- Designed full UI/UX in Figma and led front-end development for a food ordering website, integrating customer feedback and authentication features.

Tuition Management System - Android Application | Academic Project | 2025

- Designed complete UI/UX in Android Studio for a role-based application serving students, teachers, and admins with dashboards and secure login flows.

Distribution Management System | Diploma Final Project | 2024

- Created Figma UI mockups and UML documentation; focused on workflow design and real-time tracking for a supplier-to-retailer distribution platform.

Hospital Management System | Academic Project | 2024

- Designed and developed a comprehensive desktop management system; improved UI, validation logic, and reporting across two development iterations in Java and C#.
